About

Product designer with 4 years of experience defining product structures, key flows, and state models from user relationships, business processes, and system constraints. Able to drive complex products from 0-1 solution design through iterative delivery.

Experiences

Insulator Bio

UI/UX & Product Designer 2022-2026

Led product design across incubated and client product lines, contributing to business analysis, requirement breakdown, workflow definition, and iteration planning. Drove product structure, experience consistency, and cross-team delivery across multi-role, multi-module systems.

Purvar

UI/UX Designer 2022

Handled UI/UX prototyping and front-end development for legacy and new requirements, with hands-on experience from requirement framing to implementation and release.

Skills/Tools

Product & Design

Figma, Information Architecture, User Flows, Prototyping, Design Systems

Dev Collaboration

HTML/CSS/JavaScript, Vue.js, SwiftUI, Git, Astro

Others

AI Tool Workflows
Godot/Unity Interactive Prototypes
Linux Basics & Tooling

Projects

Tabmac, Dining Platform 2025-2026

Impact: Turned dining credits into a unified subscription, purchasing, and fulfillment system.

Restructured subscription, redemption, checkout, venue booking, and business purchasing flows.

Defined credit, benefit distribution, payment verification, and fulfillment rules to reduce operational friction.

Shipped core paths with a 15% shorter delivery cycle and 20%+ higher collaboration efficiency.

Treeing, Travel Platform 2023-2025

Impact: Turned repeat-guest relationships into a repeatable growth and booking system.

Defined the relationship model around Guest List and invitation mechanics to strengthen differentiated supply.

Connected key Guest and Host journeys, improving trusted revisit and conversion efficiency by 15%+.

Designed Listing Editing, Batch Set, and Calendar Connect tools to reduce multi-listing operational cost.

NEBUS, Decentralized IM 2022-2023

Impact: Improved usability and multi-device adaptability for encrypted enterprise communication.

Structured core product models around organizations, conversations, permissions, and devices based on Matrix.

Designed message, space, and status-feedback flows to lower enterprise user barriers.

Optimized information hierarchy and cross-platform structure to support enterprise expansion.

Education

Wuhan Technology and Business College

Visual Communication Design - Bachelor's Degree 2018-2022
