About

Product designer with front-end collaboration skills, focused on turning complex workflows, user relationships, and system constraints into clear product structures.

Able to drive products from problem framing and solution design through iterative delivery.

Experiences

Insulator Bio

UI/UX & Product Designer 2022-2026

Led product design from problem framing to solution delivery, contributing to business analysis, workflow definition, and iterative releases.

Drove process integration, experience consistency, and cross-team collaboration across a multi-module system to keep delivery reliable.

Purvar

UI/UX Designer 2022

Responsible for both UI/UX prototyping and front-end development, mainly focusing on the maintenance of legacy projects (based on JSP) and the implementation of new requirements from design to development (Figma → Vue.js).

Skills/Tools

Visual & Design

Figma, Illustrator, Photoshop, After Effects, Lottie, Blender, Spline

Development

HTML/CSS/Javascript, Swift UI, Git, Astro

Others

AI Tools & Workflows

Godot/Unity Engine(Interactive Prototype)

Linux Basics

Projects

Tabmac, Dining Platform 2025-2026

Impact: Built a more coherent subscription and fulfillment system around dining credits.

Designed modules across subscription, redemption, checkout, venue booking, and business purchasing.

Aligned consumer use, benefit distribution, and fulfillment logic to reduce friction across roles.

Optimized the Order → Checkout → Fulfillment path to improve completion and system clarity.

Accelerated design delivery by 15% and improved collaboration efficiency by 20%+.

Treeing, Travel Platform 2023-2025

Impact: Turned repeat-guest relationships into a clearer booking system.

Designed relationship-first flows around Guest List and invitations to strengthen differentiated supply.

Connected key traveler and Host journeys to improve trusted revisit behavior and conversion.

Designed Listing Editing, Batch Set, and Calendar Connect to reduce Host operational cost.

Improved key conversion paths and increased user conversion by 15%+.

NEBUS, De-centralized IM 2022-2023

Impact: Enhance system adaptability and user accessibility.

Participate in the design and implementation of enterprise communication products based on the Matrix protocol.

Create interaction solutions for encrypted communication scenarios to lower user barriers.

Optimize multi-device communication structure and information hierarchy to improve system efficiency.

Support system iteration and expansion to boost product adaptability in enterprise settings.

Education

Wuhan Technology and Business College

Visual Communication Design - Bachelor's Degree 2018-2022
